

# BOWMAN HEAT EXCHANGERS

## Dominating in the pool... ..... New product update from Bowman!

### **BOWMAN'S NEW BABY PACKS A POWERFUL PUNCH**

New EC 80 super compact heat exchanger EC80-5113-1 is a brand new, incredibly compact heat exchanger. Designed to handle heat transfer up to 25kW, it measures just 368mm overall – including the end covers – making it the perfect solution for heating smaller domestic pools, as well as spas and hot tubs. Available with either Titanium, Stainless Steel or Cupro-nickel tube stacks, it features composite end covers and solvent weld connections, plus an integral 7mm thermostat pocket for easy installation virtually anywhere! Add in Bowman's renowned heat transfer efficiency – up to three times faster than most competitors – and it's easy to see why this baby proved such a big hit when it launched at SPATEX 2015.

### **TOUGH, DURABLE AND RATHER GOOD LOOKING!**

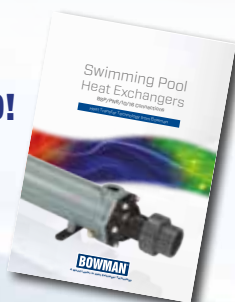

New C Coat end covers for our larger units. Introducing 'C' Coat 300. It's a new zinc rich epoxy coating that's incredibly tough. It's been developed and tested by Bowman over many years and provides a high performance, durable solution that helps remove the risk of galvanic reaction, which causes corrosion within the heat exchanger. 'C' Coat is impervious to chemical and salt water attack and has excellent corrosion resistant properties without any compromise on performance. So for 2015, all our units that don't use plastic fittings and unions will now have these specially coated cast iron end covers as standard. And, as an additional feature, the new 'C' Coat black end covers look really smart and finish the units off perfectly.

### **A GENUINELY GOOD READ!**

#### **New Swimming Pool Brochure for 2015**

Our Swimming Pool Heat Exchanger brochure has had a major makeover for 2015. It's been redesigned to provide customers with a comprehensive, easy to use guide to our extensive product range, together with detailed specification and performance data, plus useful installation and maintenance information. You'll find copies enclosed and at present, it's available in English, with other languages to follow. If you need further copies contact our marketing manager on +44 (0) 121 359 5401 or email [phil.allman@ejbowman.co.uk](mailto:phil.allman@ejbowman.co.uk)

### **THE ULTIMATE 'FIT AND FORGET' SOLUTION**

New extended range of Titanium based heat exchangers. Titanium – it's the ultimate 'fit and forget' solution for swimming pool heat exchangers. It can handle any type of pool water – including saline swimming pool water and salt water chlorinators. It resists chemical attack indefinitely and eliminates the possibility of galvanic reaction between dissimilar materials. Titanium can operate at higher flow rates compared to other materials, offering even greater heat transfer efficiency too! Now, we're extending this material option to cover every product in our extensive swimming pool range. We're also backing every tubestack with a full 10 year guarantee. Bowman titanium units deliver long life durability – whatever the pool type!

### **DOMINATING IN THE POOL - IT'S NO IDLE BOAST!**

Bowman is the leading brand in Swimming Pool Heat Exchangers due to superior design, high efficiency heat transfer, energy saving operation, renowned high quality and outstanding reliability. Most models are available ex-stock for immediate delivery and full technical and application advice is available, together with a comprehensive replacement parts back up for all models.
